

ALBERTA BEACH

GENERAL VILLAGE POLICIES

Policy: G.1.4 CULVERTS

All private property owners are responsible for the installation of culverts used in their driveways for water flow around the property and that drawings must be included with the permit application action to the Development Officer. The Development Officer will confer with the Public Works Manager to confirm the correct instrument is being installed for the area as determined by the water survey report and further that any and all costs involved are to be borne by the property owner for the installation of the culvert(s). The property owner may request the *installation* be performed by the Public works Department subject to time availability and the Public Works manager shall issue an estimate to the property owner prior to work commencement.
